HSAX PARTNERS (same firm as Sax Angle name change to The Insiders Fund)

was **ranked #2** long-short equity fund on trailing 12 month returns and positive returns YTD February 2017

Investment Strategy

THE INSIDERS FUND is a long-short equity fund focused on companies with significant insider buying and/or selling.

The same securities are often traded multiple times as opposed to a buy and hold strategy taking advantage of the short swing rule.

The Fund views its capital as inventory, seeking to find the equilibrium between the most efficient inventory turnover and maximum return on investment.

Strict risk management rules are adhered to regarding liquidity, diversification, and leverage.

Investment Process

- Our process is not to be confused with day trading or momentum trading, as all positions are analyzed from both a *fundamental* and *technical* point of view.
- We start our due diligence with the understanding that no one knows a business as well as the people running it. Therefore the Partnership prefers to trade securities or sectors that have significant insider purchases/sales, buying and selling the securities at prices and points in time determined by our own **proprietary** technical analysis.
- We spend a great deal of effort and time analyzing insider behavior and exploiting the "short swing rule." We also have developed a proprietary calendar and set of trading tools to exploit significant catalysts.

Exploiting the “short swing rule”

The **short swing** rule restricts officers and insiders of a company from making short-term profits at the expense of the firm. It's part of United States federal securities law, and is a measure intended to guard against so-called insider trading.

The rule mandates that if an officer, director, or any shareholder holding more than 10% of outstanding shares of a publicly traded company makes a profit on a transaction with respect to the company's stock during a given six month period, that officer, director, or shareholder must pay the difference back to the company.

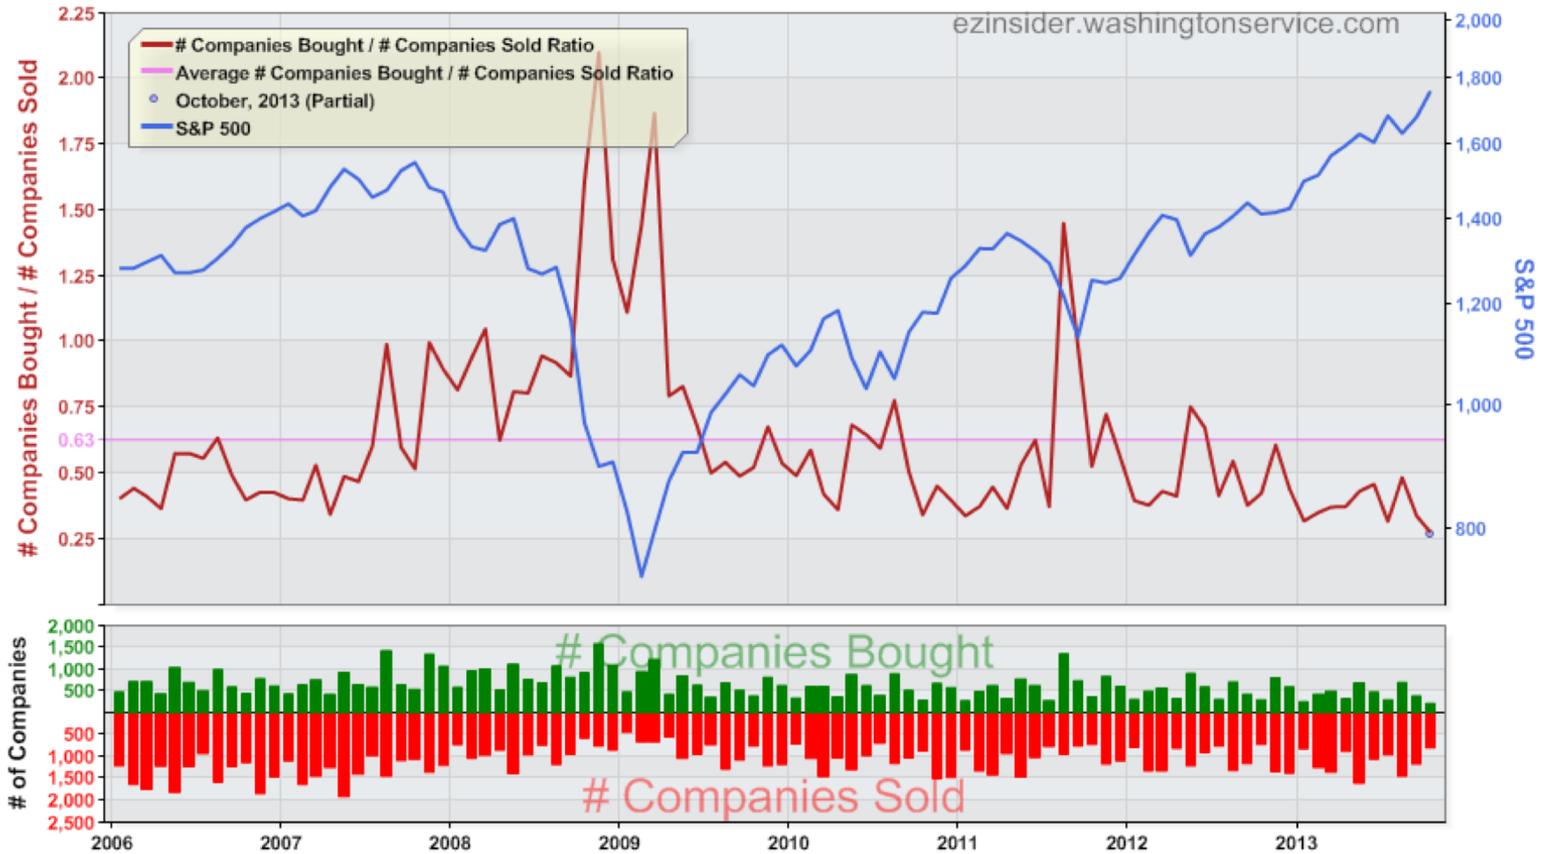

Insiders have a proven superior investment track record.

**Average Annualized Insider
Return
46.5% vs. 19% for S&P 500**

- ◇ Over the last 12 months 2017 we tracked 475 insiders that bought \$100,000 or more of their company's stock.
- ◇ We omitted from this 10% owners as we view them more like hedge funds and not working C-level officers of the Company.
- ◇ We don't look at numbers less than \$200,000 because that can be window dressing, simply execs trying to pump up investor interest.

Comprehensive Review

- 1.CHART-** *Technical set-up, favorable chart pattern for buy/sell decision*
- 2.ANALYSTS-** *third party research analysis*
- 3.INSIDERS-** *strong emphasis on insider buying more so than selling*
- 4.MANAGEMENT DISCUSSION 10Q AND 10K-** *review of important SEC filings*
- 5.MARKET DIRECTION-** *80% of stocks follow market direction in the short term*
- 6.SECTOR OUTLOOK-** *buying a good stock in a bad sector can be a humbling experience*
- 7.CASH FLOW-** *cash flow is more accurate than earnings. Earnings can be more easily manipulated.*
- 8.PEG RATIO-** *it's good to find a company growing faster than it's multiple.*
- 9.VALUATION-** *contrary to popular opinion, valuation does matter. Use a discounted cash flow analysis. If the stock is trading for substantially less than its DCF, that's a 1.*
- 10.CATALYST-** *what's going to change the status quo?*

Technical combined with Fundamental Analysis

Software designed to exploit inefficiencies in the market like "short swing" rule, overbought/oversold stochastics, RSI divergence, breakout volume, etc.

Our software allows us to monitor hundreds of securities in real time based on technical indicators some of which are proprietary to us.

Portfolio Risk Management

- The Fund invests in Level 1 securities exclusively.
- Strict diversification guidelines avoid concentrations one sector and in any one security, most investments have material insider buying
- Fund may hedge trades with pairs trades, ETF's, futures, and/or derivatives.
- Small agile fund may be entirely in cash or short, can change investment posture quickly to meet changing world

Tax Advantages

Favorable tax advantaged strategy. We employ market to market accounting as well as harvesting long term capital gains.

Mark to market accounting provides ordinary business income with no capital gain carry-forward loss limitations. Losses can offset most ordinary income as well.

Securities identified at the end of the year allow us to be long term capital gain investors.

Alpha Wealth Funds does not provide tax or legal advice. Investors should rely on their tax experts
